Different Data visualization options for Categorical Vs Categorical Feature

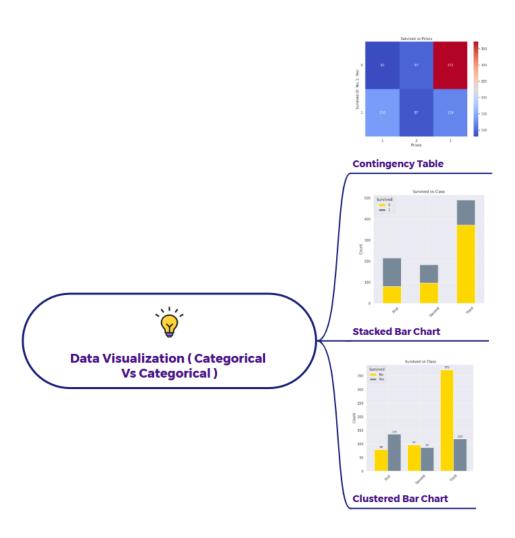

Contingency Table

Stacked Bar Chart

Data Visualization (Categorical Vs Categorical)

Clustered Bar Chart

Each graph visualizing the relationship between two categorical variables:

- **Contingency Table:** Displays the frequency distribution of two or more categorical variables, showing the counts for each combination of their categories in a tabular format.
- **Stacked Bar Chart:** Represents the composition of one categorical variable within each category of the other, with segments of the bars showing the counts of the sub-categories.
- **Clustered Bar Chart:** Compares the frequencies of different categories of one variable side-by-side for each category of the other variable.
